As cores escolhidas para a identidade visual tem base em elementos da natureza: o céu claro, a escuridão da noite e o metal polido extremamente reflexivo.

Estes elementos simbolizam o meu projeto “imagas”.

O céu e as nuvens traduzem a qualidade etérea e impermanente das músicas que produzo, caracterizada pela união de universos musicais e transições inesperadas.

A escuridão da noite complementa o céu claro, finalizando um ciclo. O universo, a natureza é movimento, sempre em transformação. Tendemos a separar as nossas ações, observando-as como algo desprendido da natureza, separação que é feita apenas em nossas mentes. Enxergo a música como qualquer outro elemento da natureza e tento captar este constante fluxo de transformações em minha arte.

O metal é o meu elemento na medicina tradicional chinesa kkkkkk. Arquetípicamente, a sua estrutura é de seguir os fortes impulsos da geração, da união, e da transformação. Este é o fogo que me move.
